1. General provisions

1.1. The basic study program (BSP) carried out by National Research Tomsk State University in subject area 45.04.01 Philology and profile Russian as a Foreign Language is a set of documents developed and approved by the University in accordance with the Federal State Educational Standard of Higher Education (FSES HE № 1299 dated November 03, 2015) in this subject area and the Regulations of TSU on Basic Study Programme of Higher Education approved on September 22, 2015 in view of the labour market demand.

The BSP regulates a set of principal characteristics of learning (workload, content, learning outcomes), organizational and teaching conditions, and forms of examination, which is presented as a curriculum, academic calendar, syllabi of disciplines (modules), programs of practices, assessment tools, and instruction materials.

1.2. Regulations

The development of the study programme and *Bachelor's* BSP relies on the following laws and regulations

- Federal Law No. 273-FZ *On Education in the Russian Federation* of 29 December 2012 (edited March 2, 2016);
- Federal Law No. 122-FZ *On Introducing Amendments to the Labor Code of the Russian Federation* and articles 11 and 73 of the Federal Law on Education in the Russian Federation of 2 May 2015;
- Federal State Educational Standard of Higher Education (*Master's Degree*) in subject area *45.04.01 Philology*, approved by Decree No. 1299 of the Ministry of Education and Science 03 November 2015;
- Decree of the Ministry of Education and Science No. 1061 *On Approval of the List of Specialisations and Subject Areas of Higher Education* dated 12 September 2013;
- Regulations for organising and carrying out educational activity within Bachelor's, Specialist's, Master's Programmes approved by Decree No. 301 of the Ministry of Education and Science 5 April 2017;
- Regulations for using e-learning and distant education technology in higher education institutions providing educational programmes approved by Decree No. 816 of the Ministry of Education and Science of the Russian Federation 23 August 2017 (registered by the Ministry of Justice 18 September 2017, registration No. 48226);
- Methodological recommendations for organizing educational activity using networking forms of carrying out study programs (Appendix to the letter of the Ministry of Education and Science of the Russian Federation NoAK-2563/05 dated August 28, 2015);
- TSU Statute;
- Development program of the Federal State Autonomous Institution of Higher Education National Research Tomsk State University for 2013-2020;
- TSU regulations.

2. Federal State Educational Standard of Higher Education (FSES HE)

in the subject area 45.03.01 Philology No. 1299 dated 03 November 2015 (*Annex 1*).

3. Overview of the study program

3.1 Entry requirements for mastering the Master's program in subject area 45.04.01 Philology.

Enrollment to the program is carried out on a competitive basis according to the results of entrance examinations on applications from applicants.

Entry examinations: an exam in Philology and an interview on the programs profile.

At the exam in the subject area (Philology) the applicant should demonstrate knowledge of basic theoretical and practical questions of philology and possession of the following general

cultural and professional competences in the scope of the bachelor's degree in subject area 45.03.01.

During the interview, preference is given to applicants who already have a certain knowledge, experience and competence in the field of study, are able to analyze their own experience and are motivated to design their own professional activity.

Applicants shall have a diploma of higher education. Overseas applicants shall have a document of higher education. Documented knowledge of Russian not lower than B2 level according to the Common European Framework of Reference for Languages (CEFR) is required.

3.2. Time limit for completing the Master's program is 2 years.

3.3. Workload amounts to 120 ECTS.

Compulsory activity within the study programme is carried out:

- in form of classroom work of students with teaching staff and (or) people involved in the study programme on different conditions;
- in form of students' self-study;
- in other forms.

Classes on disciplines (modules), intermediate attestation of students and state final examination of students are held in the form of contact (face-to-face) work and in the form of self-study, practice - in the form of contact work and in other forms.

Face-to-face interaction may be carried out in form of classroom work, out-of-classroom work and with the help of e-learning.

Classroom work of students with teaching staff is carried out in TSU study rooms (classroom, laboratory, PC classroom and other) with the direct involvement of the teacher, including the use of distance education technologies.

Out-of-classroom work of students with teaching staff is carried out to help students meeting the goal and objectives of the BSP off the schedule.

Face-to-face interaction may include other types of instruction, provide for group and individual work of the teaching staff with students.

The actual workload of classroom work makes up at least 35 % of the total amount of time allocated for the implementation of the BSP. It is determined on the basis of the form of training, content, forms of classes, educational technologies used in implementation of the BSP including e-learning and distance learning technologies.

research;
education.

3.6. BSP Profile.

Master's degree program *Russian Literature and its European Connections* is aimed at the development of students' personal qualities and the formation of general cultural and professional competencies in accordance with FSES HE in Philology. The goal of the program is to train students for research and educational activities in Russian and foreign Literature and their connections.

The goal of the program is to train a researcher of theoretical and historical-literary phenomena. It is based on the principles of historicism, consistency, conceptuality, polyfundamentalism, connection with living modern literary practice. It summarizes the knowledge gained in the history of literature and in the main directions of modern literature studies: intertextual and motifical analysis, deconstruction, new historicism, cognitive, anthropological, neo-sociological, tender and other. The program is based on different approaches to literary creativity and is interdisciplinary in nature: it actively uses methods and concepts of related sciences - aesthetics, culturology, semiotics, rhetoric, linguistics, psychology, anthropology.

The formation of scientific outlook is carried out in the conjugation of the main factors of philological learning: the justification and development of research strategies that correspond to the main trends in the development of Russian literature in the nineteenth and twentieth centuries, the based on it analytical study of the most important phenomena of the literary process and its basic laws. The integrity of theoretical-methodological and historical-literary aspects of literature comprehension contributes to the development of individual research practice of Master's students.

Attention is paid to the study of Russian literature in the context of Russian thought and new methodological trends (ethno-poetics, mythopoetics and onto-poetics) are taken into account. Students are offered a modern reading of classical works, a new, in the spirit of today's time, understanding of major literary phenomena.

Master program graduate in accordance with professional activity types is expected to solve the following professional tasks:

Research activity:

3.8. Teaching staff.

Resource support of BSP is formed according to the requirements to conditions of implementation of educational programs of Master's degree, determined by FSES HE in the subject area 45.04.01 Philology.

The Master's program is carried out by the teaching staff at NR TSU and people involved in implementation of the BSP on other conditions.

The share of the teaching staff (given integer values of rates) having education corresponding to the profile of the disciplines (modules) they teach make up 97.3% of the academic faculty carrying out the BPSP.

The share of the teaching staff (given integer values of rates) having an academic degree or an academic title is 98,6 % of the academic faculty carrying out the BSP.

The share of the teaching staff (given integer values of rates) working as heads or employees of organizations whose activity relates to the profile of the Master's program, having work experience no fewer than three years makes up 5,2 % of the academic faculty carrying out the BSP.

The Master's program *Russian Literature and its European Connections* is directed by Doctor of Philology, Professor Vitaly S. Kiselev, Head of the Department of Russian and Foreign Literature, full-time academic faculty member at the Faculty of Philology at NR TSU. He conducts independent research in the subject area and annually submits research articles to leading domestic and international journals. 22 research articles have been published for the last five years. He annually presents research results at national and international conferences. V.S. I.A. Kiselev's H-index is 9. She has been cited 222 times.

3.9 Language of instruction - Russian

4. Curriculum (Annex – 2).

5. Matrix of competencies (Annex – 3).

6. Academic calendar (Annex – 4).

7. Study programs.

7.1. Study programs of the disciplines (modules) (Annex – 5).

7.2. Study programs of the practices (Annex – 6).

8. State Examination Programme (Annex – 7).

9. Assessment tools (Annex – 8).

10. Quality assessment mechanisms

The Master's program *Russian Literature and its European Connections* implies obligatory including of various forms of assessment of the quality of the disciplines and regular monitoring of students' satisfaction into the structure.

Quality is ensured by means of the following procedures:

Satisfaction surveys

Students anonymously and voluntarily fill the questionnaire to evaluate their satisfaction with the organization of learning, curriculum and instruction, technical and technological support

of the disciplines, quality of classes, forms of research to control and increase the quality of tuition.

Survey is held annually by the program coordinators. Respondents are senior students, alumni, and employers. Results are presented in the form of a report reflecting strength and weakness of the study program. The coordinator forwards the report to the relevant Department to eliminate the revealed drawbacks. Results are discussed at the meeting of the Department. Teaching staff suggests measures for improvement of the quality of tuition and organization of learning within the study program:

- review of the content of a course;
- review of teaching methods and forms of tuition;
- review of the forms of mid-term examination;
- substitution of the course for an alternative one, others.

Students' evaluation of learning conditions at university

The TSU Quality Management Center conducts annual surveys at the end of each semester to obtain a comprehensive evaluation of the quality of learning conditions at the university. Being the recipients of the educational services students fill out the questionnaires to express their satisfaction with:

- the university and quality of work of the university units;
- the Faculty and quality of work of the administrative personnel;
- the infrastructure and quality of material and technical support of education;
- the quality of the study program and its components;
- the acquired competencies and skills.

The survey is held anonymously. The Quality Management Center processes the results and draws up an analytical report and forwards it to the coordinator of the study program. Information on the quality of work of the university units is forwarded to the heads of the units. Information on students' satisfaction with the quality of the study program may serve as a basis for improving the infrastructure at the Faculty and individual components of the study program. Students, lecturers, heads of the Departments, and Dean are informed about results of all the procedures for assessing the quality of the study program and corresponding changes made to the study program to improve its quality. Information is discussed at the meeting with Master's students, at the meetings of the Department, meetings of the Curriculum and Instruction Committee at the Faculty.

Employers' satisfaction survey

The TSU Department of Practice and Employment participates in monitoring studies on the assessment of employers' satisfaction with the qualification of alumni and arranges the system of industry-university cooperation.

Objectives:

- to identify factors contributing to cooperation between employers and TSU in terms of employment of alumni;
- to reveal employers' satisfaction with the quality of qualification of TSU alumni;
- to reveal employers' requirements for their employees.
- to determine the degree of partners' readiness for further cooperation in training and employment of alumni and identify promising forms of cooperation from the employers' perspective.

The Department of Practice and Employment processes the results. The report allows for forming a comprehensive opinion on advantages and disadvantages of tuition at the Faculty contributing to the development of promising interaction between the Faculty and partner enterprises to increase the competitiveness of alumni and chances of their employment in majors. Results are discussed at the meetings of the Department and Curriculum and Instruction Committee at the Faculty. Minutes keep records of changes in the structure, content of the BPS, syllabi of the disciplines, programs of practices, and forms of organization of research.
